

SMART LIGHTING

AND BEYOND...

Powerful and versatile Bluetooth®
networked control for today and tomorrow

The Casambi-powered control platform.

Based on Bluetooth Low Energy wireless technology, the Casambi-powered Smart Sensor Control Platform **provides a self-organizing, self-healing mesh network capable of controlling lighting fixtures throughout a floor or building from any location.**

With onboard intelligence in every device, and virtually effortless tweaks to sequences of operations or additions of new devices when building needs evolve, the Casambi-powered control network affords fingertip control now and flexibility for the future.

Designing your control network

Creating a customized control network for your specific application couldn't be easier.

The Casambi platform offers numerous choices of sensors, wireless switches and dimming power packs.

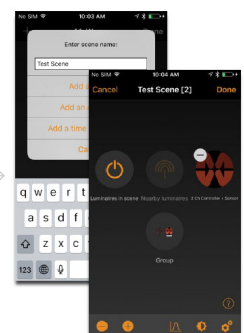

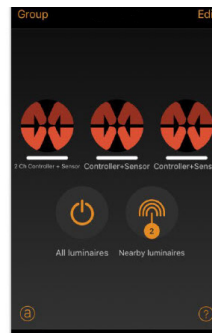

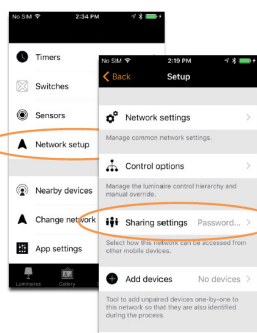

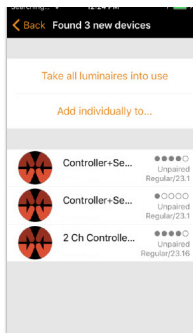

Sensors

Wireless switches

Fixture controllers

The Casambi software is available in Android and iOS mobile apps.

About Casambi

Casambi Technologies was founded in 2011 with the belief that smartphones and wireless technologies will fundamentally change the way people interface with everyday objects around them. Today, Casambi is a global leader in modern wireless lighting control solutions based on Bluetooth Low Energy. Key aspects of the Casambi solution are great user experience, high performance and scalability from basic individual fixture controls to industrial scale solutions with cloud based remote control, monitoring and data logging.
